PROFESSIONAL SUMMARY

React Native & Full-Stack Engineer with 3+ years building cross-platform mobile and web applications serving 100,000+ users. Proven expertise in performance optimization (40% improvement), complex integrations (HealthKit, Google Maps, Firebase), and AI automation. Delivered 6+ production apps with advanced features including geospatial mapping, real-time chat, biometric authentication, and payment processing.

TECHNICAL SKILLS

- **Languages & Core:** JavaScript, TypeScript, Node.js, HTML5, CSS3
- **Frameworks:** React Native, React.js, Express.js, Redux Toolkit, Next.js
- **Mobile & Maps:** iOS (HealthKit, Biometrics), Android (Google Fit), Google Maps API, GeoJSON, Haversine
- **Backend & Database:** MongoDB, Firebase (Auth, Firestore, Analytics, Cloud Functions), REST APIs, Geospatial Queries
- **Tools & DevOps:** Git, Postman, Jira, Sentry, Flipper, Android Studio, Xcode, VS Code, npm
- **AI & Automation:** n8n Workflows, OpenAI Integration, RAG (Vector Search), Prompt Engineering, Dialogflow CX
- **Integrations:** Razorpay, OAuth 2.0, WhatsApp Deep Linking, Terra API, Keycloak, Google Authenticator

PROFESSIONAL EXPERIENCE

Software Engineer (SDE-1) | *Nirmitee.io*

September 2023 – Present

- Architected 6+ cross-platform mobile and web apps (React Native, React.js) serving **100,000+ users** with 4.5 ratings, achieving 85% retention and 0.3% crash rate
- Boosted app performance **40%** via Redux optimization and RN Debugger profiling; reduced launch time 35% and improved query latency to <100ms
- Built reusable component library (25+ components) reducing development time **30%** and saving **15 hours/sprint** across multiple applications
- Integrated HealthKit (iOS) and Google Fit (Android) enabling real-time activity tracking for **50,000+ daily users** with 99.5% sync accuracy
- Engineered real-time features: audio recording with cloud sync, background tasks, push notifications (**85% open rate**, 60% CTR)
- Automated 20+ workflows using n8n + OpenAI processing **10,000+ documents/month**, eliminating **15 hours/week** manual work (50K savings)
- Integrated payment gateways (Razorpay processing **10L+**), WhatsApp deep linking (3K+ conversations), AI chatbots (5K+ monthly chats)
- Implemented OAuth 2.0, Google Authenticator, and biometric authentication reducing signup friction **40%** while maintaining bank-grade security
- Collaborated in Agile team with code reviews, sprint planning, technical documentation achieving **95% on-time delivery**

KEY PROJECTS

PainPal+ – Healthcare & Activity Tracking App

May 2024 – January 2025

- Built cross-platform health monitoring app integrating HealthKit (iOS) and Google Fit (Android) for **15,000+ active users** achieving 4.6 rating with 2,500+ reviews
- Implemented Dialogflow CX AI chatbot handling **5,000+ monthly conversations** with 92% satisfaction rate and <2 second response time
- Integrated OAuth 2.0 authentication (Google, Facebook, Apple) reducing signup friction **40%** and increasing user registration **65%**
- Developed real-time chat feature with Firebase supporting **1,000+ concurrent users** and <500ms message delivery latency

Gridbase – Interactive Contractor & Jurisdictional Mapping Platform

November 2025 – Present

- Built interactive Contractor Map using React, TypeScript, Google Maps API with real-time filtering (type, status, FTE) for **500+ contractor yards** across multiple regions
- Implemented client-side radius-based reachability using Haversine formula and GeoJSON, enabling coverage circle visualization from any location without API overhead

- Integrated turn-by-turn routing via Google Maps Directions API with multi-stop optimization reducing route planning time **60%** for field coordinators
- Developed Jurisdictional Map visualizing US county-level IBEW union coverage using GeoJSON polygons, interactive popups (union details, population, Inside/Outside %), and color-coded territories for **200+ unions**
- Designed map UX with sidebar filters (show/hide locals, isolate union), search autocomplete handling **3,000+ county polygons** with optimized rendering

AutoChart – AI-Powered Nurse Assessment & Patient Charting

March 2025 – Nov 2025

- Developed nurse-focused mobile app with AI audio assessment automatically generating structured patient charts, reducing documentation time **50%**
- Implemented Google Authenticator sign-in with 2FA providing secure access for **500+ healthcare professionals** across multiple facilities
- Built web-sync dashboard enabling real-time synchronization between mobile app and web interface for cross-platform patient record access
- Integrated speech-to-text API processing **2,000+ audio assessments monthly** with 95% transcription accuracy for clinical documentation

Rooser – Real-Time Fish Marketplace

January 2025 – March 2025

- Developed online marketplace with WhatsApp deep linking driving **3,000+ direct customer conversations** with 45% conversion rate
- Built dynamic inventory system with country-based availability and real-time stock updates for **50+ vendors** across 3 countries
- Implemented request expiry logic reducing stale orders **75%** and improving vendor response time **60%**
- Created location-based product filtering enabling users to discover local vendors within 10km radius

StoryMD – Healthcare Data Integration Platform

May 2025 – July 2025

- Integrated Keycloak for enterprise SSO authentication and authorization supporting **1,000+ healthcare provider accounts**
- Implemented native login/signup with biometric authentication (Face ID, Touch ID) plus LinkedIn, Google, Apple OAuth 2.0 sign-in
- Used Terra API to fetch and aggregate health data from multiple wearables (Apple Watch, Fitbit, Garmin) for comprehensive patient insights
- Built unified health dashboard displaying real-time metrics (heart rate, steps, sleep) from 5+ data sources with <3 second load time

Gaushala – Donation Management App

January 2024 – March 2024

- Built donation app with Razorpay payment gateway processing **10L+ in donations** with 99.9% transaction success rate
- Created deep linking for donation campaigns enabling direct payment links via WhatsApp increasing conversion **35%**

9Je – AI-Powered Automation Platform

November 2025 – Present

- Designed n8n automation workflows with OpenAI integration and RAG pipelines automating **25+ business tasks** saving **120 hours monthly**
- Built vector search integration reducing document query time from 30 seconds to 2 seconds (**93% improvement**)
- Created automated notification system processing **50,000+ messages/month** across email, SMS, Slack with 99.8% delivery rate

Mconsole – Healthcare Media Collaboration Platform

June 2025 – January 2026

- Created healthcare media platform with 2FA security protecting **1,000+ provider accounts** while maintaining HIPAA compliance
- Engineered advanced calendar system (drag-drop, multi-day events, conflict detection) scheduling **500+ monthly appointments** with zero double-bookings
- Implemented role-based access control (RBAC) for 4 user types (Admin, Doctor, Nurse, Patient) with granular permission management
- Built media upload and sharing feature supporting 5+ file formats with automatic compression reducing storage costs **40%**

GoApi – Sports Discovery Platform for “Get Out and Play India”

October 2023 – December 2023

- Developed sports discovery platform enabling users to find inclusive sports events across **50+ cities** in India with **10,000+ users**
- Created community features (comments, ratings, RSVPs) increasing user interaction **40%** and event attendance **25%**

EDUCATION

Bachelor of Science in Computer Science | Vivekanand College, Sambhaji Nagar, India | 2019 – 2023
